Colors: Beige (as in photographs below and Black). Sleeve design must allow for quick draw and aiming of weapon i.e. the sleeve hems should not restrict the upper arms when performing the aforesaid actions.

Inner ballast pockets:
CLIN # 3: 3-1 Coat

3-in-1 coat rainproof and breathable synthetic fabric outer shell: The windproof fleece/soft shell inner liner should be a detachable uniform jacket in its own right. This means the coat provides solutions for all the weather conditions encountered during the year – cool and dry, windy, warm and rainy, cold and rainy, stormy, cold.

The fit of the coat must leave sufficient room for a guard’s belt equipment (twin magazine holster, pistol in holster, radio, IDNS pouch, flashlight).

The hood: should offer full protection in storms, like the adjustable storm hood on the current LGF coat: Fabric peak with adjustable internal stiffener, to keep rain off face and prevent the hood flopping down over the forehead and obscuring vision.

Ability to seal the area between collar and hood to prevent ingress of water via the neck area (achieved on the current LGF coat by means of flaps on each side that meet over the chin/front of neck and are securable by means of 2 press studs).

Closure method. The specifications in the PR are for a coat like the current LGF coat which has a two-way zip, as well as an outer storm flap with press stud closures. The two-way zip, as well as the press stud closures on the storm flap offer options to ensure that guards and armed guards have adequate protection from rain, cold and stormy conditions while facilitating fast access to belt-worn equipment (Weapon etc).

Quantity & positions of pockets in outer shell. Two external lower pockets with zip closures. 1 internal breast pocket with zip closure. 1 pocket on left upper arm with Velcro fastening for flap.

Velcro adjusters on cuffs

Black windproof fleece inner jacket length: must cover equipment on belt twin magazine holster, pistol in holster, radio, IDNS pouch, flashlight).

Black windproof fleece inner jacket length to have at least two pockets, 1 or 2 way zip and storm collar and must not be bulky. The jacket should have 3 mooring-loops, 1 on each cuff and 1 at the rear below the collar. There are press-stud tabs on the outer coat for securing the mooring loops.
Note: Color of coat is black – the gray appearance is just to show details more easily.
CLIN # 4 & 5: Short & Long Sleeve Polo Shirt
